From the ADA

CDC data show increases in diabetes, prediabetes

2022-01-28

A report by the CDC found 37.3 million Americans, or 11.3% of the US population, are estimated to have diabetes while 38%, or 96 million, are estimated to have prediabetes. The 2017-2020 data from the agency's [National Diabetes Statistics Report](#) showed an increase from 2018 when 34.2 million people were estimated to have diabetes and 88 million prediabetes.
