

Digital Roster verses printed

Council members I was asked to provide a report on the current roster and the possibility of putting the information on the District Website.

I did speak to a few individuals regarding this and this is what I found.

Some members find that the cost outweighs the value

Cost of this year's roster including shipping for 1050 copies \$5250 with advertising and sponsorships of \$775

Putting the information on the website would probably require the individual's permission and would be quite an issue with privacy laws that may not be the same in Canada and the US.

I would propose that the roster be redesigned to be set with the district pages followed by the clubs in that district. This way each Zone chair, President and secretary could be sent an email copy of the entire roster that they could store on their computer.

They could then print only the information for their districts that they require for their own reference.

Currently we sell around 100 rosters so there are quite a few that are willing to pay to have it so we could do a small printing for the council and for sale for those that want a full printed issue.

This would reduce costs and still make all the information available to those that need it.

I would entertain a motion to that effect so that we can open a discussion.

Respectfully submitted
